

Agenda :

- 1) BFS
- 2) Dijkstra's Algorithm.
- 3) MST

Linked In

Given two users u & v .
Find their degree of connection.

Breadth first Traversal (BFS)

Code

```
vst [N+1] = {false};
```

```
void bfs (source, ) {
```

```
    Queue<int> q;
```

```
    q.enqueue(source);  
    vst[source] = True;
```

```
    while (!q.isEmpty()) {
```

```
        u = q.dequeue();
```

```
        for (all v connected to u) {
```

```
            if (vst[v] == false) {
```

```
                vst[v] = True;
```

```
                q.enqueue(v);
```

```
            }
```

```
        }
```

```
    }
```

```
}
```

$O(V + E)$

```
int finddegree (u, v, N) {
```

```
    vst[N+1] = {false};
```

```
    Queue <Pair <int, int> > q
```

↓ ↓
first second
(Node) <Degree>

```
    vst[u] == True;  
    q.enqueue (u, 0);
```

```
    while (! q.isEmpty()) {
```

```
        w = q.dequeue();
```

```
        node = w.first();  
        degree = w.second();
```

```
        for (all nodes z connected to node) {
```

```
            if (vst[z] == false) {
```

```
                if (z == v) {  
                    return degree + 1;  
                }
```

g.enqueue(z, degree+1);

vst[z] = True;

}

}

}

return -1;

}

T.C = $O(V+E)$

Given source & dest cell.
find the min distance b/w them

Can't use
DP

\Rightarrow BFS algorithm.

Given an undirected weighted graph where the weights of the edges is $\in \{1, 2\}$

find the shortest distance to every node from a given source node.

- 1 : $\langle 2, 1 \rangle, \langle 4, 1 \rangle$
- 2 : $\langle 1, 1 \rangle, \langle 3, 2 \rangle, \langle 9, 1 \rangle$
